## **1. Interview Guide**

Q0. Demographics (Name, Age, Gender, Nationality)

Q1. Are you currently a student or a graduate? Which course are you enrolled at? Which year/Semester?

Q2. Do you think sustainability is important in engineering education? why?

Q3. In your opinion, is there a direct relation of your education with sustainability?

Q4. Are you currently enrolled into any Sustainability course? Which?

Q5. Have you been enrolled in other sustainability courses before?

Q6. Why have you decided to enrol (or not) in the Sustainable Design & Production course?

Q7. Have you been presented to any tools or methods that helped you to become more interested in sustainability? Or that you found interesting?

Q8. What can the university do to foster a more sustainable mindset in its students and teachers? What would work for you, personally?

Q9. Do you think your university provides enough opportunities for you to enrol in sustainability aspects?

Q10. Are you currently working with any sustainability-related project?

Q11. Do you think it is important to think about sustainability when developing projects? Why?

Q12. Do you usually try to implement sustainability in your projects? Why (not)?

Q13. How do you implement sustainable ideas in your work/projects? How often do you do it?

Q14. Do you think it is possible to develop sustainable projects as an engineer in real setups, like in a job? / How do you do this implementation?

Q15. What would be your strategy to try to push sustainable ideas further?

Q16. In your opinion, what would be the best way to develop a sustainable mindset in engineers?

Q17. Where do you think your motivation for sustainable thinking stems from?

Q18. When and how did you first start to grow your sustainable/environmental awareness?

Q19. In which fields of study do you think sustainability should be a primary focus?

Q20. Where do you think is most important to put energy to foster sustainable mindsets in current and future generations of professionals?
